

Data Logger DPRO

DPRO is general purpose low power Data logging system.

Data can be conveniently and securely stored in removable USB memory.

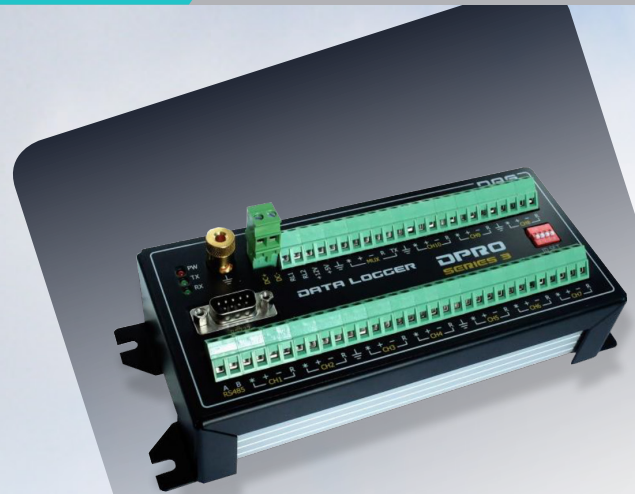

- Process Monitoring
- Building Monitoring
- Automotive Testing
- Flood warnings
- Research and Development

DPRO supports a wide range of sensor types includings.

but not limited to the following : thermistors.

4-20mA current loops mv out put sensors.

Vibrating wire sensors.

■ Specification - Data Logger

Channel	10-30 Sensor channels
Power	12Vdc
Accuracy	0.15% ~ 0.3%
Data storge	SD memory Card
Data Format	Text file
Serial Interface	RS 232 Serial Interface speed 9600baud
Network Interface	RS 485
Operating Temp	-45°C to 70°C
Dimension	
Weight
